# Highlights

## Our profile

- A leader in financial services in Iceland, Íslandsbanki is a universal bank with total assets of ISK 1,205bn and a 25-50% market share across all domestic business segments.
- Building on over 140 years of servicing key industries, Íslandsbanki has developed specific expertise in tourism, seafood and energy related industries.
- Driven by the vision to be #1 for service, Íslandsbanki's relationship banking business model is propelled by three business divisions that manage and build relationships with the Bank's customers.
- Íslandsbanki has developed a wide range of online services such as the Íslandsbanki, Kort and Kass apps, enabling customers to do their banking whenever and wherever. At the same time, the Bank continues to operate the most efficient branch network in Iceland through its strategically located 14 branches.
- In 2018, Íslandsbanki led the Icelandic Customer Satisfactory Index for banks for the sixth consecutive year and in July 2018, Euromoney selected Íslandsbanki as the best bank in Iceland.
- Íslandsbanki has a BBB+/A-2 rating from S&P Global Ratings.

 \*\*Earnings on regular income now includes profit from discontinued operations. The Bank has introduced a new long term minimum capital target of 16% (CET1 16%), resulting in adjustments to its ROE on regular operations from previous levels (CET1 15%).  
 \*\*\*The cost/income ratio for parent company 1Q19 is 58.1%.

## Directors' Report

These are the condensed consolidated interim financial statements for the first quarter of 2019 ("the interim financial statements") of Íslandsbanki hf. ("the Bank" or "Íslandsbanki") and its subsidiaries (together referred to as "the Group").

### Operations in the reporting period

Íslandsbanki is a universal bank offering comprehensive financial services to households, corporations, and institutional investors in Iceland. The Group is one of Iceland's largest banking and financial services groups, with a strong domestic market share.

The profit from the Group's operations for the reporting period amounted to ISK 2,589 million, which corresponds to 5.9% annualised return on equity. At the end of the reporting period, the Group employed 1,070 full-time members of staff, including 834 within the Bank itself.

Net interest income rose by 5% between years as loan growth was very robust in 2018. Net fee income was up by 16%, due to strong growth in both the Bank and its subsidiaries. Other income was about 1.6bn and mostly explained by a settlement of the Bank's claim deriving from the acquisition of Byr savings bank back in 2011. Salary costs were up by 3% between years and other operating expenses grew by 4%.

Net impairments were negative by ISK 0.9 billion and are largely explained by a less favourable economic environment and forward looking provisions under the IFRS 9 standard. At the same time the Bank's ratio of non performing loans increased only modestly from 2.0% to 2.2%.

The Group's loan book grew by 3.2% in the first quarter on the back of strong demand in all lending units and higher FX denominated loans as the Icelandic króna weakened in the quarter.

Customer deposits increased by 5.6% during the quarter, mainly on the back of an increase in deposits from institutional investors. The Bank continued to have good access to capital markets and issued ISK16 billion in covered bonds in the quarter and about ISK 30 billion in foreign currency denominated senior unsecured private placements. In the beginning of April the Bank issued a new EUR 300 million benchmark transaction with maturity in 2022 and at the same time tendered for about the same amount a part of the EUR 500 million bond that is maturing in 2020, thereby effectively managing the maturity profile of the Bank's outstanding debt.

At the Bank's annual general meeting in March, Tómas Már Sigurðsson was elected as a new board member and will serve as Vice-Chairman of the Board. Tómas has extensive experience from management roles in the aluminum industry and is currently a senior vice-president of strategic alliances for Alcoa.

The Bank engaged BCG Nordics to help to formulate a new strategy for the Bank and the outcome was presented to the Bank's employees at a strategic summit at the end of March. The strategy work was based on extensive research, industry insights and benchmarks, identifying the competitive advantages and future strategic positioning in a changing environment. The outcome of the work was an articulation of the Bank's purpose, values and vision along with a list of strategic initiatives to be implemented in the next five years. The purpose of "Moving Iceland forward through empowering our customers to succeed" was defined through input from workshops with all employees. It articulates a more active role of the Bank in a shaping and progressing society. The purpose is further supported by three values that will serve as a guiding principles for employees in all their efforts: "Passion, Professionalism, and Collaboration".

To live the purpose and values, Íslandsbanki continues to be guided by the vision to be '#1 for service', placing the customer at the centre of gravity for value creation. The Bank will put a strong emphasis on technology to facilitate innovation and development of simple, efficient solutions for its customers. Going forward, the Bank will be reinforcing its commitment to corporate social responsibility (CSR) by integrating social and environmental impact as a driver of strategy and value creation within the Bank. As such, the Bank's CSR work will be centered around four of the United Nations's seventeen SDGs: #4 Quality education; #5 Gender equality; #9 Industry, innovation and infrastructure; and #13 Climate action.

### Outlook

The Icelandic economy is cooling markedly after a period of robust growth. The latest public forecast from Íslandsbanki Research, published in January, assumes 1.1% GDP growth in 2019. That forecast is likely to be revised downwards following setbacks in the tourist and seafood sectors in Q1. Growth is expected to pick up again in 2020 as business investment and the tourism sector recover.

Debt levels of households, corporates and the public sector have remained stable in recent quarters and the current level of resilience in the domestic economy and financial system is considerable as a result.

The Bank's ratio of non-performing loans remains low overall and borrower debt levels are at historically low levels. As a result of the forward looking mechanism of the IFRS 9 standard, it can however be expected that the slower growth in the economy will lead to increased impairments in the short term. The Bank continues to have a strong capital and liquidity position and is therefore prepared for changes in the economic activity.

# Directors' Report

## Statement by the Board of Directors and the CEO

The interim financial statements for the period 1 January to 31 March 2019 have been prepared on a going concern basis in accordance with the International Accounting Standard (IAS) 34 Interim Financial Reporting as adopted by the European Union; the Act on Annual Accounts, no. 3/2006; the Act on Financial Undertakings, no. 161/2002; and rules on accounting for credit institutions, where applicable.

To the best of our knowledge, these interim financial statements provide a true and fair view of the Group's operating profits and cash flows in the reporting period and its financial position as of 31 March 2019.

The Board of Directors and the CEO have today discussed and approved the Condensed Consolidated Interim Financial Statements for the period 1 January to 31 March 2019.

Kópavogur, 8 May 2019

### Board of Directors:

Friðrik Sophusson, Chairman  
Tómas Már Sigurðsson, Vice-Chairman  
Anna Þórðardóttir  
Auður Finnbogadóttir  
Árni Stefánsson  
Hallgrímur Snorrason  
Heiðrún Jónsdóttir

### Chief Executive Officer:

Birna Einarsdóttir

# Notes to the Consolidated Financial Statements

## 1. Corporate information

Íslandsbanki hf., the parent company, was incorporated on 8 October 2008 and is a limited liability company domiciled in Iceland. The condensed consolidated interim financial statements for the first quarter of 2019 ("the interim financial statements") comprise the financial statements of Íslandsbanki hf. ("the Bank" or "Íslandsbanki") and its subsidiaries together referred to as "the Group".

At the end of the first quarter 2019 the Bank was wholly owned by the Icelandic Government. The shares are administered by the Icelandic State Financial Investments in accordance with Act no. 88/2009 on Icelandic State Financial Investments.

The interim financial statements were authorised for issue by the Board of Directors of Íslandsbanki hf. on 8 May 2019.

## 2. Basis of preparation

The interim financial statements have been prepared in accordance with the International Accounting Standard (IAS) 34 Interim Financial Reporting, as adopted by the European Union and additional requirements in the Act on Annual Accounts no. 3/2006, the Act on Financial Undertakings no. 161/2002 and rules on accounting for credit institutions.

The interim financial statements do not include all the information required for annual financial statements and should be read in conjunction with the audited consolidated financial statements of the Group for the year ended 31 December 2018, as well as the unaudited Pillar 3 Report for the year ended 31 December 2018. Both are available on the Bank's website: [www.islandsbanki.is](http://www.islandsbanki.is).

On 1 January 2019 the Group implemented IFRS 16 - Leases, the impact of the implementation on the opening balance sheet at 1 January 2019 is disclosed in Note 3.

The Group's management has made an assessment of the Group's ability to continue as a going concern and is satisfied that the Group has the resources to continue in business for the foreseeable future. Therefore, the interim financial statements have been prepared on a going concern basis.

The interim financial statements have been prepared on an historical cost basis except for the following items in the statement of financial position: bonds and debt instruments which are measured at fair value, shares and equity instruments which are measured at fair value, derivative financial instruments which are measured at fair value, non-current assets and disposal groups classified as held for sale which are measured at the lower of its carrying amount and fair value less costs to sell and certain debt securities which are measured at fair value. Recognised financial liabilities designated as hedged items in qualifying fair value hedge relationships are measured at amortised cost adjusted for changes in fair value attributable to the risk being hedged.

The interim financial statements are presented in Icelandic króna (ISK), which is the functional currency of Íslandsbanki hf. All amounts presented in ISK have been rounded to the nearest million, except when otherwise indicated.

### Important accounting estimates and judgements

The preparation of the interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses recognised. Actual results may differ from those estimates.

Estimates and underlying assumptions are under constant review. Changes in accounting estimates are recognised when they occur.

Key areas where management has made difficult, complex or subjective judgements, include those relating to the allowance for credit losses, the fair value of financial instruments and intangible assets.

### Changes in presentation

The Group has changed its presentation in the consolidated interim statement of financial position as follows:

- The line item "Non-current assets and disposal groups held for sale" has been included in the line item "Other assets"
- The line item "Non-current liabilities and disposal groups held for sale" has been included in the line item "Other liabilities"

## 3. Changes to accounting policies

The accounting policies in the interim financial statements are consistent with those applied in the Group's audited consolidated financial statements for the year ended 31 December 2018, except for changes to the accounting for leases resulting from the adoption of IFRS 16. Those changes are described below.

### IFRS 16 – Leases

The Group adopted a new IFRS standard, IFRS 16 – Leases, which replaced IAS 17, IFRIC 4, SIC 15 and SIC 27 as of 1 January 2019. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for most leases under a single on-balance sheet model.

As a result of the adoption of IFRS 16, the Group has changed its accounting policy for lease contracts as follows.

# Notes to the Consolidated Financial Statements

## 3. Cont'd

### The Group as a lessee

#### Recognition

At the inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Group has elected not to separate non-lease components and account for lease and non-lease components of a contract as a single lease component. This policy is applied to contracts entered into, or changed, on or after 1 January 2019.

The Group recognises a lease liability and a right-of-use asset at the lease commencement date.

#### Measurement

##### *Lease liabilities*

The lease liability is initially measured at the present value of the lease payments, both fixed and variable, discounted using the entity's incremental borrowing rate. The lease liability is measured at amortised cost using the effective interest method and remeasured when there is a change in future payments, e.g. arising from a change in an index or an assessment of whether extension or termination options will be exercised.

After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made.

##### *Right-of-use assets*

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred less any lease incentives received. For any remeasurement of the lease liability a corresponding adjustment is made to the carrying amount of the right-of-use asset or recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The right-of-use-asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term. Right-of-use assets are subject to impairment.

#### Modification

If a lease modification increases the scope of the lease by adding a right to use of one or more underlying assets and the consideration for the lease increases by an amount commensurate with the stand-alone price for the increased scope and any adjustments to the price that reflects the circumstances of the particular contract, then the modification is accounted for as a separate lease.

For lease modifications that are not accounted for as separate leases the lease term of the modified lease is redetermined and the lease liability remeasured using the revised lease payments and discounted using the incremental borrowing rate at the effective date of modification. Any adjustment of the lease liability is then correspondingly made to the right-of-use asset.

#### Presentation

The Group presents right-of-use assets in the line item "Property and equipment" and lease liabilities in the line item "Other liabilities" in the statement of financial position. Maturity analysis of lease liabilities is disclosed in Note 50. Interest on lease liabilities is recognised in profit or loss in the line item "Interest expense". Depreciation of right-of-use assets is recognised in profit or loss in the line item "Other operating expenses".

The Group has elected not to recognise right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Group recognises lease payments associated with these leases as an expense on a straight-line basis over the lease term.

### Impact of adoption of IFRS 16

The Group applied IFRS 16 using the modified retrospective approach and therefore the comparative information has not been restated. On transition to IFRS 16 the Group elected to apply the practical expedient to apply the standard only to contracts previously identified as leases under IAS 17.

At transition, lease liabilities were measured at the present value of the remaining lease payments, discounted with each entity's incremental borrowing rate as at 1 January 2019. Right-of-use assets are measured at an amount equal to the lease liabilities at transition, adjusted by the amount of any prepaid or accrued lease payments.

On transition to IFRS 16, the Group recognised ISK 4,489 million of right-of-use assets and the same amount in lease liabilities. All lease liabilities and right-of-use assets at transition and throughout the first quarter of 2019 stem from CPI-linked real estate lease commitments for offices, branches and storage. When measuring lease liabilities, each entity discounted lease payments using its incremental borrowing rate at 1 January 2019. The weighted average rate applied by the Group is 2.12% for CPI-indexed leases.

# Notes to the Consolidated Financial Statements

## 3. Cont'd

### Reconciliation between IAS 17 lease commitments and IFRS 16 lease liabilities as at 1 January 2019

Operating lease commitments at 31 December 2018 as disclosed in the Group's consolidated financial statements .....	5,143
Effects of discounting operating lease commitments using the incremental borrowing rate .....	( 593)
Recognition exemption for short-term and low-value asset leases .....	( 61)
<b>Lease liabilities recognised at 1 January 2019</b>	<b>4,489</b>

When applying IFRS 16 to leases previously classified as operating leases under IAS 17 the Group used the following practical expedients; not to recognise right-of-use assets and liabilities for leases with less than 12 months of lease term and for leases of low-value assets; exclude initial direct costs from measuring right of use assets at the date of initial application, and using hindsight when determining the lease term if the contract contains options to extend or terminate the lease.

### The Group as a lessor

Lessor accounting under IFRS 16 is substantially unchanged from IAS 17. Lessors will continue to classify leases as either operating or finance leases using similar principles as in IAS 17. Therefore, IFRS 16 did not have an impact for leases where the Group is the lessor.

## 4. Operating segments

Segment information is presented in accordance with the Group's management and internal reporting structure. The Bank has three main business segments: Personal Banking, Business Banking and Corporate & Investment Banking. Operating segments pay and receive interest to and from Treasury to reflect the allocation of capital, funding costs and the relevant risk premium. The accounting policies for the reportable segments are in line with the Group's accounting policies. The Group operates mainly in the Icelandic market.

The Group comprises the following operating segments:

### Personal Banking

Personal Banking provides comprehensive financial services to individuals, such as lending, savings and payments. Íslandsbanki's customers are increasingly taking care of their day-to-day banking via digital solutions such as apps, the online bank and the secure web chat. Customers can also visit the Bank's efficient branch network for comprehensive consultancy services.

### Business Banking

Business Banking provides wide-ranging financial services to small- and medium-sized enterprises. Business Banking is organised around the branches where it can service its customers close to their own business. In addition, Business Banking operates Ergo, the asset based financing unit of the Bank.

### Corporate & Investment Banking

Corporate & Investment Banking provides universal banking services to large companies, municipalities, institutional investors and affluent individuals. Services include customised products and services to customers including lending and advisory, risk management, brokerage and private banking services. The division is sector-focused, building and maintaining relationships with key customer segments within Iceland. Outside of Iceland, Íslandsbanki has a special focus on the North Atlantic seafood industry, leveraging its expertise in the domestic market and global contacts.

### Treasury and Proprietary trading

Treasury is responsible for funding the Bank's operations and for managing the internal pricing framework. It is also responsible for the Bank's balance sheet management and for the relations with investors, financial institutions, stock exchanges and rating agencies. Equity that is not allocated to business units sits within Treasury. Proprietary Trading includes equity and debt investments in the trading book and banking book.

### Cost centres

Cost centres comprise the CEO's office (Human Resources, Marketing & Communications, Strategy and Legal), Finance excluding Treasury and Proprietary Trading, Operations & IT, Risk Management and Compliance. Group Internal Audit is included in cost centres, however, it is independent from the Bank and the Chief Audit Executive reports directly to the Bank's Board of Directors.

### Subsidiaries, eliminations and adjustments

Subsidiaries include Borgun hf., Íslandssjóðir hf., Allianz Ísland hf. and other less significant subsidiaries (see Note 27).

Following is an overview showing the Group's performance with a breakdown by operating segments. Comparative amounts due to organisational changes have not been restated.

## 6. Fair value information for financial instruments

### Financial instruments carried at fair value

The fair value of a financial instrument is the transaction price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Where a market price is not readily available, the Group applies valuation techniques based on estimates and assumptions that are consistent with that which market participants would use in setting a price for the financial instrument.

The table below shows financial instruments carried at fair value at 31 March 2019 categorised into three levels of fair value hierarchy that reflect the type of inputs used in making the fair value measurements. The different levels have been defined as follows:

Level 1: Inputs that are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.

Level 2: Valuation techniques based on observable inputs other than the quoted prices included in Level 1, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Valuation techniques based on significant unobservable inputs, e.g. internal assumptions.

### At 31 March 2019

	Level 1	Level 2	Level 3	Total
Bonds and debt instruments .....	78,670	-	2,139	80,809
Shares and equity instruments .....	9,842	41	5,385	15,268
Derivative instruments .....	-	4,837	-	4,837
<b>Total financial assets</b>	<b>88,512</b>	<b>4,878</b>	<b>7,524</b>	<b>100,914</b>

Other .....	40	30
<b>Fair value at 31 March 2019</b>	<b>2,139</b>	<b>5,385</b>

## Notes to the Condensed Consolidated Interim Financial Statements

### 6. Cont'd

	Bonds and debt instruments	Shares and equity instruments
Fair value at 1 January 2018 .....	1,828	3,373
Purchases .....	8	790
Net loss on financial instruments recognised in profit or loss .....	( 249)	( 135)
Net gain on financial instruments recognised in other comprehensive income .....	-	610
Transfers from Level 1 or 2 .....	-	50
Other .....	( 73)	-
<b>Fair value at 31 December 2018</b>	<b>1,514</b>	<b>4,688</b>

The responsibility for the valuation of the fair value of financial instruments lies with the relevant business units. Each quarter, the business units present a valuation report to the Investment Committee for approval. The report and its assumptions are reviewed by Risk Management.

Where applicable, fair values are determined using quoted prices in active markets for identical assets and liabilities. In other cases, where there is no active market, the fair value is estimated using valuation techniques such as net present value and discounted cash flow models; comparison with similar instruments for which observable market data exists; net asset value (NAV) for investment fund units or expected recovery for distressed bonds. These valuation techniques are based on various assumptions and inputs such as risk-free rate, expected revenue growth and credit and liquidity spreads. In some cases, where significant inputs into these models are not observable, expert judgement and estimation for these inputs are required.

At the end of each reporting period the Group determines whether transfers have occurred between levels in the hierarchy, by reassessing categorisation based on the lowest level input that is significant to the fair value measurement as a whole.

*Level 1: Fair value established from quoted market prices.*

Level 1 financial assets and financial liabilities contain actively traded bonds and equities that are listed either domestically or abroad.

*Level 2: Fair value established using valuation techniques with observable market information.*

Level 2 assets and liabilities contain domestic bonds, equities as well as derivatives. For interest rate derivatives contracts such as interest rate swaps (IRS) and cross-currency interest rate swaps (CIRS) the Group calculates the net present value of estimated future cash flows based on yield curves with key inputs such as interest swap rates and forward-rate agreements (FRAs) rates. Foreign-currency forwards and foreign-currency swaps are valued using the FX spot rate adjusted for forward pricing points that can be obtained from market sources. These products are classified as Level 2. Bond forwards and equity forwards are also classified as Level 2 as they are valued using standard models with key inputs observed from stock prices, estimated dividend rates and funding rates.

*Level 3: Fair value established using valuation techniques using significant unobservable market information.*

Level 3 assets contain primarily unlisted and illiquid equities and bonds. Unlisted equities and bonds are initially recorded at their transaction price but are revalued each quarter based on the models as described above. At 31 March 2019 the Group's Level 3 equities amounted to ISK 5,385 million. These include shares in five professional investment funds and investment companies investing in unlisted equities and specialised investments in Iceland totalling ISK 1,696 million. The Group receives information from fund managers which use valuation models for the valuation of these equities. Full access to information of all components in these valuation models is unavailable to the Group and is therefore no basis for assumptions for sensitivity analysis.

The Group holds Series C preferred shares in Visa Inc., amounting to ISK 2,356 million, which are subject to selling restrictions for a period of up to 9 years and under certain conditions may have to be recalled. The fair value of the preferred shares is closely linked to the market value of Visa Inc. at NYSE stock exchange, written down by 30% due to uncertainty of the final number of shares and marketability.

For other Level 3 equities, changes in components for valuation will have minimal impact on the Group's income statement.

The Group's Level 3 bonds amounted to ISK 2,139 million. The majority of the amount in Level 3 bonds is estimated by discounting cash flow where the yield is the contractual currency's base rate with a premium that is decided by expert judgement on projected risk and financing cost.

## Notes to the Condensed Consolidated Interim Financial Statements

### 7. Financial instruments not carried at fair value

#### Assets

The fair value of "Loans to customers" may differ from their net carrying amount because the interest rates they carry may not reflect the interest rates that similar new loans would carry. The fair value is estimated by subtracting from or adding to the net carrying amount of the loans the discounted interest rate difference calculated from the reporting date until the next interest reset or maturity, whichever comes first. Since the interest rate difference is estimated using internal models these assets are classified as Level 3.

For "Cash and balances with Central Bank", "Loans to credit institutions" and "Other financial assets" the fair value is adequately approximated by the carrying amount as they are short-term in nature. They are thus classified as Level 2.

#### Liabilities

The fair value of a financial liability with a demand feature, such as a demand deposit, is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid. Most deposits are on demand or carry floating interest rates and as such their carrying amount is considered a good approximation of their fair value. The fair value for longer term fixed rate deposits is calculated with a duration approach, using the difference in each liability's current interest rate from the rate that a similar deposit would carry today. All deposits are classified as Level 2 based on the use of observable market interest rates to estimate the fair value.

Observed market value is used for the fair value of "Debt issued and other borrowed funds" where it is available. Issued bonds and bills with quoted market prices are classified as Level 1. If there is no quoted market price the fair value of the debt is valued in the same manner as deposits if it carries a fixed rate. If the debt carries a floating rate its fair value is estimated by comparing the margin with the Group's current funding premium on similar debt. These liabilities are classified as Level 2. The funding premium is based on the interest margin in the Group's issued papers including covered bonds, commercial papers as well as foreign currency denominated bonds.

Other financial liabilities mainly include unsettled securities transactions and liabilities to retailers for credit card provisions and they are classified as Level 2 since their value is not observable from active market prices. Due to the short-term nature of these liabilities their carrying amount is considered a good approximation of their fair value.

The following tables show the fair value measurement and classification of the Group's assets and liabilities not carried at fair value. The different levels are defined in Note 6.

#### At 31 March 2019

	Level 1	Level 2	Level 3	Total fair value	Carrying amount
Cash and balances with Central Bank .....	-	129,039	-	129,039	129,039

<b>Net foreign exchange loss</b>	<b>( 30)</b>	<b>( 10)</b>

## Notes to the Condensed Consolidated Interim Financial Statements

### 14. Other operating income

	2019	2018
	1.1-31.3	1.1-31.3
Share of loss of associates, net of income tax .....	-	( 32)
Legal fees .....	20	19
Rental income .....	10	9
Legal dispute settlement* .....	1,103	-
Other net operating income .....	11	17
<b>Other operating income</b>	<b>1,144</b>	<b>13</b>

\*In February 2019 Íslandsbanki and Old Byr reached an agreement on the settlement of the dispute deriving from the acquisition of Byr savings bank in 2011.

### 15. Salaries and related expenses

	2019	2018
	1.1-31.3	1.1-31.3
Salaries .....	3,144	3,020
Contributions to pension funds .....	458	440
Social security charges and financial activities tax* .....	422	433
Other .....	27	33
<b>Salaries and related expenses</b>	<b>4,051</b>	<b>3,926</b>

\*Financial activities tax calculated on salaries is 5.5% (2018: 5.5%).

### 16. Other operating expenses

	2019	2018
	1.1-31.3	1.1-31.3
Professional services .....	1,262	1,324
Real estate and fixtures .....	764	872
Depreciation and amortisation .....	397	214
Other administrative expenses .....	616	514
<b>Other operating expenses</b>	<b>3,039</b>	<b>2,924</b>

### 17. Net impairment on financial assets

	2019	2018
	1.1-31.3	1.1-31.3
Allowance for expected credit losses, on-balance sheet items* .....	( 920)	53
Allowance for expected credit losses, off-balance sheet items .....	7	35
Changes of provision due to court rulings .....	( 6)	-
<b>Net impairment on financial assets</b>	<b>( 919)</b>	<b>88</b>

\*The main reasons for the additional allowance are: a less favourable economic environment (ISK 400 million), a change in the relative weighting of economic forecasts (ISK 250 million) and an unfavourable ruling in a court case (ISK 190 million).

## Notes to the Condensed Consolidated Interim Financial Statements

### 18. Income tax expense

Income tax is recognised based on applicable tax rates and tax laws. The income tax rate for legal entities in 2019 is 20% (2018: 20%). Special financial activities tax is calculated as 6% of taxable profits exceeding ISK 1 billion in accordance with the Act on Financial Activities Tax no. 165/2011. The effective income tax rate in the Group's income statement for the first quarter of 2019 is 30.9% (2018: 42.2%).

	2019	2018
	1.1-31.3	1.1-31.3
Current tax expense excluding discontinued operations .....	1,057	1,195
Special financial activities tax .....	237	297
Difference in prior year's calculated income tax .....	( 2)	1
Changes in temporary differences due to deferred tax assets and deferred tax liabilities .....	( 139)	( 478)
<b>Income tax recognised in the income statement</b>	<b>1,153</b>	<b>1,015</b>

	2019		2018	
	1.1-31.3		1.1-31.3	
Profit before tax .....	3,730		2,399	
20% income tax calculated on the profit of the period .....	746	20.0%	480	20.0%
Special financial activities tax .....	237	6.3%	297	12.4%
(Income) expenses not subject to tax .....	( 31)	( 0.8%)	25	1.0%
Non-deductible expenses .....	177	4.7%	157	6.5%
Other differences .....	24	0.7%	56	2.3%
<b>Effective income tax expense</b>	<b>1,153</b>	<b>30.9%</b>	<b>1,015</b>	<b>42.2%</b>

The Bank is taxed jointly with its subsidiary Íslandssjóðir hf.

### 19. Profit from discontinued operations

	2019	2018
	1.1-31.3	1.1-31.3
Net (loss) profit from sales of foreclosed mortgages .....	( 1)	40
Net share of profit from disposal groups held for sale .....	13	673
<b>Profit from discontinued operations, net of income tax</b>	<b>12</b>	<b>713</b>

### 20. Earnings per share

	Discontinued operations			
	Excluded		Included	
	2019	2018	2019	2018
	1.1-31.3	1.1-31.3	1.1-31.3	1.1-31.3
Profit attributable to shareholders of the Bank .....	2,639	1,473	2,651	2,186
Weighted average number of outstanding shares .....	10,000	10,000	10,000	10,000
<b>Basic earnings per share</b>	<b>0.26</b>	<b>0.15</b>	<b>0.27</b>	<b>0.22</b>

The Group's basic and diluted earnings per share are equal as the Group has not issued any options, warrants, convertibles, or other potential sources of dilution (2018: none).

## Notes to the Condensed Consolidated Interim Financial Statements

### 21. Cash and balances with Central Bank

	31.3.2019	31.12.2018
Cash on hand .....	4,088	3,095
Balances with Central Bank .....	108,317	114,849

<b>Included in cash and cash equivalents</b>	<b>115,299</b>	<b>120,993</b>
Mandatory reserve deposits with Central Bank .....	13,740	14,063
<b>Cash and balances with Central Bank</b>	<b>129,039</b>	<b>135,056</b>

\*Balances as defined in Act no. 37/2016 on the treatment of króna-denominated assets subject to special restrictions and rules no. 490/2016 on special reserve requirements for new foreign currency inflows.

### 22. Derivative instruments and short positions

At 31 March 2019	Notional values related to assets		Notional values related to liabilities	
	Assets	Liabilities	Assets	Liabilities
Interest rate swaps .....	1,330	100,705	3,396	141,935
Cross-currency interest rate swaps .....	2,151	45,465	1,808	61,016
Equity forwards .....	365	4,240	184	2,986
Foreign exchange forwards .....	521	10,943	50	4,047
Foreign exchange swaps .....	467	22,136	1,273	41,160
Bond forwards .....	3	1,070	614	24,320
<b>Derivatives</b>	<b>4,837</b>	<b>184,559</b>	<b>7,325</b>	<b>275,464</b>
<b>At 31 December 2018</b>				
Interest rate swaps .....	1,037	102,429	3,422	134,010
Cross-currency interest rate swaps .....	1,821	69,691	1,184	28,309
Equity forwards .....	419	4,596	78	1,195
Foreign exchange forwards .....	359	9,242	196	3,869
Foreign exchange swaps .....	875	35,726	440	13,373
Bond forwards .....	39	3,511	201	19,993
<b>Derivatives</b>	<b>4,550</b>	<b>225,195</b>	<b>5,521</b>	<b>200,749</b>

The Group uses derivatives to hedge currency exposure, interest rate risk in the banking book as well as inflation risk. The Group carries relatively low indirect exposure due to margin trading with clients and the Group holds collaterals for possible losses. Other derivatives in the Group held for trading or for other purposes are insignificant.

The Group applies hedge accounting only with respect to certain EUR denominated interest rate swaps, whereby the Group pays floating rate interest and receives fixed rate interest. The interest rate swaps are hedging the exposure of changes in the fair value of certain fixed-rate EUR denominated bonds (see Note 33) arising from changes in interest rates. The Group applies fair value hedge accounting to the hedging relationships. At the end of the first quarter 2019 the total fair value of the interest rate swaps was positive and amounted to ISK 772 million and their total notional amount was ISK 41,250 million.

## Notes to the Condensed Consolidated Interim Financial Statements

### 23. Loans to credit institutions

<b>Pledged assets against liabilities</b>	<b>195,024</b>	<b>191,729</b>

The Group has pledged assets against the issuance of covered bonds under Icelandic law, which are pledged on a pool of consumer mortgage loans. The underlying cover pool must withstand a weekly stress test.

The Group has also pledged cash in foreign banks and financial institutions, mainly as collateral for trades under ISDA agreements to hedge market risk.

<b>Debt issued and other borrowed funds</b>					<b>325,035</b>	<b>300,976</b>

\*Íslandsbanki repurchased own covered bonds during the period amounting to ISK 288 million.

\*\*This bond issuance is classified as being designated as at fair value through profit or loss. At 31 March 2019 the total carrying amount of the bond amounted to ISK 71,186 million and included in the amount are fair value changes amounting to ISK 664 million. The carrying amount of the bond at 31 March 2019 was ISK 1,233 million higher than the contractual amount due at maturity.

\*\*\*The Group applies hedge accounting to this bond issuance and uses certain EUR denominated interest rate swaps as hedging instruments (see Note 22). The interest rate swaps are hedging the exposure of the Group's changes in the fair value of this fixed-rate EUR denominated bond arising from changes in interest rates. The Group applies fair value hedge accounting to the hedging relationships. At 31 March 2019 the total carrying amount of the bond issuance amounted to ISK 41,911 million and included in the amount are fair value changes amounting to ISK 250 million.

The covered bond amounts do not contain the bonds reserved for securities lending.

# Notes to the Condensed Consolidated Interim Financial Statements

## 38. Related party

Íslandsbanki is wholly owned by the Icelandic Government. The shares are administered by the Icelandic State Financial Investments (ISFI). As a result, the Icelandic Government and the Icelandic State Financial Investments are defined as related parties. The Group has applied the partial exemption for government-related entities, as described in IAS 24, and does not disclose those transactions in the related party note.

The Board of Directors and key management personnel of the Bank, ISFI and subsidiaries of the Bank, close family members of individuals referred to herein and legal entities controlled by them, are defined as related parties.

The Group's associates are also defined as related parties.

The Group's products and services are offered to the Icelandic Government and government-related entities in competition with other vendors and under generally accepted commercial terms. In a similar manner, the Bank and other Group entities purchase products and services from government-related entities under generally accepted commercial terms. Transactions with related parties were made in the ordinary course of business on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with third party counterparties.

Cash and balances with the Central Bank are disclosed under Note 21 and Deposits from the Central Bank are disclosed under Note 30.

All loans to employees are provided on general business terms of the Group and the balances do not reflect collaterals held by the Group.

At 31 March 2019 ISK 2 million were recognised as Stage 1 expected credit loss against balances outstanding with related parties (2018: ISK 2 million). No share option programmes were operated during the reporting period.

# Notes to the Condensed Consolidated Interim Financial Statements

## 39. Contingencies

### Contingent liabilities

#### Borgun hf.

Borgun hf., a subsidiary of Íslandsbanki, is a payment acquirer and issuing processor. Landsbankinn hf. sold its 31.2% stake in Borgun in late 2014. Landsbankinn claims that Borgun's management did not disclose all available information that might have affected the value of Borgun during the sales process, namely the worth of its stake in Visa Europe which was sold to Visa International shortly after the Borgun sale. In order to reclaim the alleged loss, Landsbankinn filed a lawsuit on 12 January 2017 against four defendants, including Borgun hf., claiming the right to damages for having been deprived of the true value of the stake involved in the sale. Landsbankinn does not quantify the claim, but its estimate of the lost profit from having sold its shares in Borgun is approximately ISK 1,930 million. Seeing that the conclusion of the case is uncertain and the financial effect cannot be estimated the Group has not recognised a provision in relation to this matter. The court has appointed professionals to assess certain matters regarding the claim but it is uncertain when the assessment will be completed. Therefore, it is uncertain when a ruling is to be expected.

## 40. Events after the reporting period

No events have arisen after the reporting period that require amendments or additional disclosures in the interim financial statements for the first quarter 2019.

## 41. Risk management

### Risk governance

The Group is exposed to various risk factors and managing these risks is an integral part of its operations. More information about the Group's risk management and risk assessment processes is available in the unaudited Pillar 3 Report. The Pillar 3 2018 Report is available on the Bank's website: [www.islandsbanki.is](http://www.islandsbanki.is).

## 42. Credit risk

Credit risk is defined as current or prospective risk to earnings and capital arising from an obligor's potential failure to meet the terms of any financial contract with the Group.

Credit concentration risk is the significantly increased risk that is driven by common underlying factors, e.g. industrial sector, economy, geographical location, type of financial instrument or due to connections or relations among counterparties. This includes exposures to parties under common control and significant exposures to groups of counterparties whose likelihood of default is driven by common underlying factors.

Credit risk arises principally from loans and advances to customers and other banks but also from balances with the Central Bank and off-balance sheet items such as financial guarantees, loan commitments and derivatives.

The Group has policies and procedures dedicated to accepting, measuring, and managing credit risk. The objective of the Group's credit risk management is to achieve an appropriate balance between risk and return and to minimise potential adverse effects of credit risk on the Group's financial performance.

A thorough analysis of the counterparty's financial standing, analysis of past and estimated future cash flows as well as the borrower's general ability to repay its obligations forms the basis for all credit decisions. The Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, groups of borrowers, countries and industry segments. The Group measures and consolidates its credit risk for each counterparty or group of connected clients in accordance with internal and external criteria of connection between parties.

The Group employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security in borrower's assets. The principal collateral types for loans are properties, vehicles, equipment, vessels and securities. When applicable, other credit risk mitigants are employed.

## Notes to the Condensed Consolidated Interim Financial Statements

### 43. Maximum credit exposure

The Group's credit risk exposure comprises both on-balance sheet and off-balance sheet items. Maximum exposure to credit risk for on-balance sheet assets is the net carrying amount as reported in the statement of financial position. The maximum exposure for off-balance sheet items is the amount that the Group might have to pay out against financial guarantees and loan commitments, less provisions that have been made because of these items. The maximum credit exposure for a derivative contract is calculated by adding potential future credit exposure to the positive market value of the contract.

The industry breakdown shows the credit exposure by industry classification. The breakdown follows an internal industry classification which is based on the Icelandic ISAT2008 that derives from the European NACE Rev. 2 classification standard.

The Group's credit exposure, before taking account of any collateral held or other credit enhancements, is as follows:

#### Maximum credit exposure at 31 March 2019

# Notes to the Condensed Consolidated Interim Financial Statements

## 44. Credit exposure covered by collateral

Collateral and other credit mitigants vary between types of obligors and credit facilities. Loans to credit institutions are usually unsecured. For loans to individuals the principal collateral taken is residential property against mortgages. In the case of corporate entities the Group takes a charge over assets such as real estate, vessels, cash and securities and as well as other collateral including accounts receivables, inventory, vehicles and equipment. Loans to government entities and to municipalities are more often than not unsecured. Derivative exposures are generally made under ISDA master agreements with Credit Support Annex or corresponding terms with pledged collateral in the form of cash and government bonds.

In some cases the Group uses guarantees as a credit enhancement but since guarantees effectively transfer credit risk from one counterparty to another they do not represent a reduction in maximum exposure to credit risk. Covenants in loan agreements are also an important credit enhancement but do not reduce maximum credit exposure.

Valuation of collateral is based on market price, official valuation for tax purposes or expert opinion of the Group's employees, depending on availability. In the case of fishing vessels the associated fishing quota is included in the valuation. Collateral is allocated according to the gross carrying amount of loans and nominal off-balance sheet items, and is measured without including the effect of overcollateralisation. This means that if some loans have collateral values in excess of their gross carrying amount, then the excess is removed in order to reflect the Group's actual maximum exposure to credit risk. The total value of pledged assets can thus be higher than the cover indicates. The maximum credit risk exposure is measured on net carrying value basis, and therefore collateral allocation can in some instances be higher.

For capital leases the Group remains the owner of the leased object. In total ISK 37,896 million of the collateral are leased objects.

The following tables show the maximum exposure to credit risk by class of financial asset and collateral held against those exposures.

An overview of collateral held by the Group against credit exposure is shown below for exposures in Stages 1 and 2 (non credit-impaired) and exposures in Stage 3 (credit-impaired):

<b>At 31 March 2019</b>	Maximum exposure to credit risk	Real estate	Vessels	Cash & securities	Vehicles & equipment	Other collateral	Total credit exposure covered by collateral

### 45. Credit quality of financial assets

The following table provides the gross carrying amount of loans and credit risk exposure on loan commitments and financial guarantees. Amounts are broken down by risk class and the method by which their respective credit loss allowances (ECL) are calculated, i.e. Stage 1, 2 and 3.

The Group uses internal rating models to assess the default probability of corporate and retail customers. The models assign each customer to one of ten risk classes. One risk class is for customers in default (risk class 10), and nine risk classes are for performing customers (risk classes 1-9). Risk classes are assigned on customer level and not facility level.

The rating of corporate customers is based on a company's most recent financial statement, together with a qualitative assessment of its management, market position and industry sector.

For retail customers the Group uses two different statistical rating models. One model is for individuals and another is for small companies with a total exposure to the Group of less than ISK 150 million. These models are behavioural scoring models and use information about a customer's payment history, amount of debt and deposits, and demographic variables to assess the probability that a customer will default on any of his obligations within 12 months of the rating assessment.

## Notes to the Condensed Consolidated Interim Financial Statements

### 45. Cont'd

Risk classes 1-4 represent low risk, risk classes 5-6 moderate risk, risk classes 7-8 increased risk, risk class 9 high risk, and risk class 10 represents customers that are in default. Unrated are loans originating from subsidiaries of Íslandsbanki that do not have rating models, in addition to loans that are yet to be rated.

Further information on the risk classes, including the mapping from risk classes to the probability of default, can be found in Section 4.2.2 of the unaudited Pillar 3 2018 Report.

The same customer can have loans and off-balance sheet commitments in Stages 1 and 2 simultaneously. However, if a customer has an exposure in Stage 3 then all other loans and commitments are classified as Stage 3 as well.

As explained in Note 72.3 in the consolidated financial statements for the year 2018, the Group has a new harmonised definition of default. The new definition is broader than each individual definition, in particular the previous definition of Risk class 10.

#### At 31 March 2019

## Notes to the Condensed Consolidated Interim Financial Statements

### 46. Forbearance and write-offs

When restructuring or modification measures are believed to be more appropriate than collection procedures, the Group offers several debt relief measures and restructuring frameworks for customers in financial difficulties. These forbearance measures include temporary payment holidays, extension of loan terms, capitalisation of arrears and waiving of covenants.

When a loan has been renegotiated or modified but not derecognised the Group also reassesses, after a certain trial period, whether the loan is still considered to have a significant increase in credit risk. The Group also considers whether forborne assets classified as Stage 3 should be recognised and transferred to Stage 2.

Once an asset has been classified as forborne, it will remain forborne for a minimum 24-month probation period. In order for a loan to be reclassified out of the forborne category, the customer has to meet all of the following criteria:

- All of the customer's facilities have to be considered performing; and
- The customer does not have any contract that is more than 30 days past due; and
- The probation period of two years has passed from the date the forborne contract was considered performing; and
- Regular payments of more than an insignificant amount of principal or interest have been made during at least half of the probation period.

The following table provides a summary of the Group's forborne assets.

#### At 31 March 2019

# Notes to the Condensed Consolidated Interim Financial Statements

## 47. Large exposures disclosure

When the Group's total exposure to a group of connected clients is 10% or higher of the Group's capital base it is considered a large exposure. Both on-balance sheet and off-balance sheet items from all types of financial instruments are included in the exposure as defined by regulation no. 233/2017. The Group has internal criteria that define connections between clients. These criteria reflect the Group's interpretation of Article (1)(a) of the Act on Financial Undertakings no. 161/2002, where groups of connected clients are defined. Since the interim financial statements for the first quarter of the year are not audited, the official capital is based on reviewed own fund items at 31 December 2018.

The exposure is evaluated both before and after credit risk mitigating effects. After mitigating effects, the Group currently has four large exposures. No large exposure is above the maximum 25% single large exposure limit set by the law.

The following tables show the Group's large exposures as a percentage of the Group's capital base, before and after eligible credit risk mitigating effects.

### At 31 March 2019

Groups of connected clients:	Before	After
Group 1 .....	73%	1%
Group 2 .....	13%	12%
Group 3 .....	12%	11%
Group 4 .....	11%	11%

Group 1 .....	73%	-
Group 2 .....	12%	12%
Group 3 .....	12%	11%
Group 4 .....	11%	11%
Group 5 .....	13%	11%

## 48. Liquidity risk

The Group defines liquidity risk as the risk of not being able to fund its financial obligations or planned growth, or only being able to do so substantially above the prevailing market cost of funds.

The Group's main source of funding is customer deposits. Treasury is responsible for the Bank's funding and liquidity management in line with internal and regulatory limits and policies. Treasury manages the Bank's intraday liquidity. Risk Management, as the second line of defence, is responsible for independent reporting on the liquidity position to internal and external stakeholders and providing a holistic view on liquidity risk on a consolidated basis.

## 49. Liquidity Coverage and Net Stable Funding Ratio

Key measures for the assessment of liquidity risk are the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR). The Central Bank of Iceland, which is the main supervisory authority regarding liquidity risk, has incorporated the LCR and the NSFR based on the CRD IV standards into the rules on liquidity ratio and the rules on funding ratio in foreign currencies. In addition, the Group complies with the Financial Supervisory Authority's guidelines no. 2/2010 on best practices in liquidity management and liquidity coverage ratio rules no. 266/2017.

The following tables show the NSFR and the LCR for the Group at the end of March 2019 and at year-end 2018.

<b>Net Stable Funding Ratio</b>	31.3.2019	31.12.2018

### 49. Cont'd

#### Deposits by Liquidity Coverage Ratio category

The Group's deposits are categorised by counterparty according to the Liquidity Coverage Ratio (LCR) standard. The groups are listed in order of estimated stability and the respective LCR outflow weight. Deposits are also classified as stable if the customer has an established business relationship with the Bank and is covered by an effective insurance scheme.

### 50. Maturity analysis of assets and liabilities

The following tables show the contractual payments of principal and interest for the Group's financial liabilities. Thus, the total figures for each liability class are higher than the respective balance sheet amount. Cash flows for payments of unknown nature, such as for floating rate, CPI-linked or foreign currency denominated instruments, are based on internal yield curves and forecasts.

For dated financial liabilities the amounts are grouped into maturity buckets according to contractual maturities of principal and estimated contractual payments of interest. For demand deposits or other non-dated liabilities, the figures are grouped according to the first possible required payment date.

In accordance with the IFRS 16 standard Lease liabilities has been added to the maturity analysis of financial liabilities.

#### Maturity analysis 31 March 2019

## Notes to the Condensed Consolidated Interim Financial Statements

### 50. Cont'd

Off-balance sheet liabilities show the amount of contractual obligations that the Group has taken towards customers, either by committing to lend out money in the future or as third party guarantees. The amounts shown reflect the maximum amount, not taking into account the Group's ability to reduce overdraft or credit card limits before the current undrawn amount is fully utilised by the customer. These obligations all fall into the first time bucket since contractually, on a case-by-case basis, the Group could be required to fulfil these obligations instantaneously.

<b>Off-balance sheet liabilities</b>	On demand	Up to 3 months	3-12 months	1-5 years	Over 5 years	No maturity	Total

### 51. Market risk

The Group defines market risk as the current or prospective risk to earnings and capital arising from adverse movements in the level or volatility of prices of market instruments, such as those that arise from changes in interest rates, equity prices, commodity prices and foreign exchange rates.

Market risk within the Group can broadly be split into two categories, trading book and banking book. The trading book includes market risk exposures related, directly or indirectly, to the Group's short- and medium-term trading in securities, currencies and other capital market instruments and derivatives. All financial assets and liabilities in the trading portfolio are recognised at fair value and all resulting changes are immediately reflected in the income statement. The banking book includes market risk exposures related to securities held for long-term investment purposes, unlisted securities or holdings in subsidiaries or affiliates. A large part of the banking book market risk is due to mismatches in the composition of assets and liabilities, for example with respect to currencies, interest rates, CPI-indexation or other factors that can affect the Group's earnings or earnings volatility. These mismatches are reported to management and are subject to internal and regulatory limits.

### 52. Derivatives

The Group uses derivatives to hedge currency exposure, interest rate risk in the banking book as well as inflation risk. However, the Group is subject to indirect exposure through customers' margin trading. Margin trading is subject to continuous monitoring and collateral requirements. Other derivatives held for trading or for other purposes are insignificant.

### 53. Interest rate risk

Interest rate risk is defined as the current or prospective risk to earnings or capital arising from adverse movements in interest rates.

Sensitivity measures like Basis Point Value (BPV) are used to measure and manage risk arising from its fixed income exposures. The BPV measures the effect of a 0.01 percentage point upward parallel shift in the yield curve on the fair value of these exposures.

## Notes to the Condensed Consolidated Interim Financial Statements

### 53. Cont'd

#### Interest rate risk in the trading book

The fixed income trading unit invests mainly in government bonds, bonds issued by the Housing Financing Fund (HFF) which are guaranteed by the Icelandic Government, domestic municipality bonds and covered bonds issued by other Icelandic banks. Bonds and bills in the Group's liquidity portfolio are also categorised in the trading book. In the table below the total market value (MV) of long and short positions may not be the same as reported in Note 5 since netting between short and long positions is not applied here. Derivatives and securities used for hedging are excluded from the table.

#### Interest rate risk in the banking book

Interest rate risk in the banking book arises from the Group's core banking activities. The main source of this type of interest rate risk is the risk of loss from fluctuations in future cash flows or fair value of financial instruments as interest rates change over time, reflecting the fact that the Group's assets and liabilities are of different maturities and are priced relative to different interest rates.

The following table shows the interest sensitivity of the Group's banking book from a parallel 100 basis points change in all yield curves, with all other variables held constant, categorised by the date of next interest rate reset.

### 54. Currency risk

Currency risk is the risk that earnings or capital may be negatively affected from the fluctuations of foreign exchange rates, due to transactions in foreign currencies or due to a mismatch in the currency composition of assets or liabilities.

The analysis of the Group's foreign currency exposure presented below is based on the contractual currency of the underlying balance sheet items. Additionally, there are off-balance sheet items that carry currency risk and are included in the total currency imbalance. The off-balance sheet amounts below represent the notional amounts of derivatives and unsettled spot agreements.

# Notes to the Condensed Consolidated Interim Financial Statements

## 55. Inflation risk

The Group is exposed to inflation risk since the value of CPI-linked assets exceeds CPI-linked liabilities. The value of these assets and liabilities changes according to changes in the CPI at any given time and all changes in the CPI affect profit and loss. A 1% increase in the index would lead to an ISK 112 million increase in the balance sheet and a 1% decrease would lead to a corresponding decrease, other risk factors held constant.

	31.3.2019	31.12.2018
<b>Assets, CPI-linked</b>		
Bonds and debt instruments .....	2,996	2,721

<b>Total liabilities</b>	<b>282,758</b>	<b>284,637</b>
<b>CPI imbalance</b>	<b>11,240</b>	<b>12,001</b>

## 56. Capital management

The following table shows the capital base, risk exposure amount, the resulting capital ratios, and leverage for the Group at 31 March 2019 and 31 December 2018. In addition, the table shows the official capital ratios where the unaudited profit of the first quarter is excluded according to the Act on Financial Undertakings.

The Group's regulatory capital requirement is calculated according to CRD IV as implemented through Act no. 161/2002 on Financial Undertakings and regulation no. 233/2017 on prudential requirements for financial undertakings. Capital requirement calculations for credit risk and market risk are based on the standardised approach whereas the capital requirement calculations for operational risk are based on the basic indicator approach.

The Group aims at managing its capital position and the corresponding capital ratios above the overall regulatory capital requirement. According to the latest SREP report from the Financial Supervisory Authority, published in October 2018, the overall capital requirement is 18.8%, increasing to 19.3% in May 2019 when the countercyclical buffer will increase by 0.5%. The Group's capital target includes a 0.5-2.0% management buffer on top of the overall capital requirement.

The minimum leverage ratio for Icelandic financial institutions is 3%.
